Advanced volumetric infusion pumps

Agilia, Vigilant and Centerium are registered trademarks by Fresenius Kabi in selected countries. Due to our policy of continuous product development as well as changes in standards, the features described are subject to change. Please contact us for the most updated information. These medical devices are regulated by health authorities. Please refer to the respective CE Declaration of Conformity for the applicable Medical Device Directive or Regulation. Pictures are not contractual.

On top of VP features and to meet the demand of a changing clinical environment, Agilila VP MC has been developed to be used intuitively and to promote more safety and comfort.

## Agilia VP MC

# Advanced volumetric infusion pumps

Agilia VP MC offers a wide range of flow rates as well as programming modes that suit all infusion protocols, from the simplest to the most advanced.

### Adaptable to all protocols

- Agilia VP MC offers a wide range of programming modes: loading dose, micro-infusion, manual bolus, programmed bolus, drop /min ...

### A wide range of flow rates

- The infusion can be programmed from 0.1 up to 1500 mL/h.
- The flow rate range available from the keyboard can be configured.

### Dose rate programming

- The pump can be programmed in dose rate with direct translation into flow rate in mL/h.

### Safety in line

- The SafeClip on the Volumat Lines automatically clamps the line to avoid any risk of free-flow when the door is opened.
- The connectors with different shapes and colour codes facilitate the installation and make it impossible to insert the administration set the wrong way round.
